EDUCATION

Degree/ Qualification	Institute Name	Percentage /CGPA	Passing Year
B.Tech in Computer Science Engineering (Artificial Intelligence)	Vishwakarma Institute of Technology, Pune	8.62	2028
Diploma in Computer Technology	JSPM’s Polytechnic , Pune	91.43 %	2025
SSC (10th)	Marvel School , Kolhapur	90.80%	2022

TECHNICAL SKILLS:

Languages	C, C++, Python, Java, JavaScript.
Computer Fundamentals	OOP, DBMS, CN, Data Structure and Algorithms, Machine Learning
Web Development	React.js, Node.js, Tailwind CSS, BootStrap, Flask, RESTful API
Database	MySQL, MongoDB
Tools	Visual Studio Code, Git, GitHub, Android Studio
Testing Testing	Selenium / Playwright (Basic), API Testing, Postman

WORK EXPERIENCE:

N/A

PROJECTS

Placify – AI-Augmented Placement Preparation Platform (Ongoing)

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT Authentication, Tailwind CSS

- Developing a full-stack career networking platform enabling students and professionals to share placement experiences and opportunities.
- Building REST APIs with JWT authentication and MongoDB database to manage users, posts, and community interactions.
- Designing a responsive React dashboard with role-based access for placement preparation resources and peer discussions.

Intelligent Fraudulent Transaction Detection System (Ongoing)

Tech Stack: Python, Scikit-learn, XGBoost, LightGBM, TensorFlow/Keras, FastAPI, SHAP

- Developing a machine learning system to detect fraudulent financial transactions using ensemble models and anomaly detection techniques.
- Implementing data preprocessing and class imbalance handling using SMOTE, feature scaling, and model evaluation metrics.
- Building a FastAPI-based inference service with SHAP explainability to provide real-time fraud prediction and model interpretability.

Procrastination Timer (Pomodoro Productivity Web App)

Tech Stack: HTML, CSS, JavaScript, Git, GitHub

- Built a web-based productivity application implementing the Pomodoro technique to improve focus during work and study sessions.
- Developed an interactive timer with start, pause, and reset functionality using JavaScript event handling and DOM manipulation.
- Designed a responsive user interface using HTML and CSS and managed version control using Git and GitHub.

CERTIFICATION

- Complete Artificial Intelligence & Python Developer Course – Udemy (Ongoing)
- Complete JavaScript with HTML5 & CSS3 – Udemy
- Build a Robust RESTful API with PHP 8 – Udemy

CO-CURRICULAR ACTIVITIES

Student Event Coordinator – CodeApex 2.0, Vishwakarma Institute of Technology; Coordinated event logistics and participant management to ensure smooth execution (2026).

- **Event Anchor – College Technical & Cultural Events**; Hosted and managed stage communication while engaging the audience during programs (2025–Present).
